CHANGING LIVES WITH
SMART LIVING TECHNOLOGIES

Cognitively Accessible Technologies Used Directly by Individuals at Home, School, Work and in the Community for Smart Living
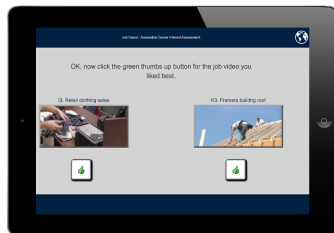

AbleLink VantagePoint

Obtaining feedback from people with cognitive disabilities has historically been done via processes which effectively remove the voice of the one receiving services. Vantage-Point enables agencies to conduct surveys and access real-time data directly from the the individuals they serve.

AbleLink JobQuest

AbleLink JobQuest is a web-based service that gives people with cognitive disabilities a voice in their own career path. Employing AbleLink's ATLAS survey engine and Data Reports system, JobQuest presents multiple job categories and gathers career interest data regarding the preferences of the individual.

ATLAS Travel Readiness Assessments

ATLAS Travel Readiness Assessments address a key issue in giving people with intellectual disabilities the freedom to travel in their community: How to be sure whether a person is ready to go out on their own. The Assessments evaluate the training process and point out areas in need of improvement.
