

ABLELINK SMART DESKTOP SERVICE

AbleLink Smart Living Desktop provides a cognitively accessible desktop computer experience, including audio and picture based email, internet browsing, and music playing. Smart Desktop Service subscribers also receive implementation guidance, software updates, training, coaching, and ongoing support.

The AbleLink Smart Desktop Service helps people with cognitive disabilities to connect with their world.

“It just brightens my day”

- Smart Living Desktop's cognitively accessible interface is research-based and includes personalization settings to simplify access to web content, music, videos, and email based on individual needs.
- Provides a safe computing environment through use of powerful safeguards for email correspondence and internet surfing.
- Smart Living Email features a picture based “friends and family” address book and audio email options to enable sending and receiving email without needing literacy skills or keyboard use, while only allowing incoming email from approved contacts.
- Web Trek, our cognitively accessible browser, includes a simplified, customizable interface for accessing web sites and online content. YouTube and other web videos can be accessed safely with content controls.
- The Smart Living Desktop suite of applications run on any desktop, laptop, tablet, or All-in-One running Windows 10 or higher. Touch screen recommended, but not required.
