

ABLELINK SMART TRAVEL SERVICE

Smart Travel Service subscribers receive full access to the AbleLink WayFinder® app for cognitively accessible travel in the community. Ongoing training and active implementation support are provided by AbleLink staff for initial assessment and consultation, setup, route creation, and customization.

The AbleLink WayFinder® app helps people with cognitive disabilities to travel safely and engage their community on their own terms.

**“This is my freedom,
my independence”**

- The Smart Travel Service includes assistance with route building and management, as well as ongoing training for family members, job coaches, DSP's, or anyone creating routes for travelers
- To take a trip, travelers tap on the picture of their desired destination and the software takes over from there, guiding the individual with location-based picture and voice prompts
- Real-time route monitoring is available for an extra measure of security and peace of mind during travel
- WayFinder® includes cognitively accessible features that provide travelers with route correction and instant communication with route managers
- Medicaid waiver funding is available in some states - contact AbleLink for details
