

ABLELINK SMART DESKTOP SERVICE

The AbleLink Smart Living Desktop software provides a cognitively accessible desktop computer experience, including audio and picture based email, internet browsing, and music playing. Smart Desktop Service subscribers also receive implementation guidance, software updates, training, coaching, and ongoing support.

The AbleLink Smart Desktop Service helps people with cognitive disabilities to connect with their world.

“It just brightens my day”

- Smart Living Desktop’s cognitively accessible interface is research-based and includes personalization settings to simplify access to web content, music, videos, and email based on individual needs.
- Email correspondence and internet browsing are supported in a personalized environment through the use of powerful safeguards.
- Smart Living Email features a picture based “friends and family” address book and audio email options to enable sending and receiving email without the need for literacy or keyboard skills, only allowing incoming messages from approved contacts.
- Web Trek, our cognitively accessible browser, includes a simplified, customizable interface for safely accessing web sites and videos with built-in content controls.
- The Smart Living Desktop software runs on any desktop, laptop, or tablet running Windows 10 or higher. A touch screen interface is recommended but not required.
- Medicaid waiver funding is available in some states. Contact AbleLink for details.
NOTE: AbleLink does not provide internet service
